Audience questions for keynote speakers

How does seaweed differ from the methane vaccine in reducing methane from ruminants?

How well prepared are we for legislation and policy that enables this integration and adaption of industries for the future?

What is the basic difference between voluntary carbon markets and the emissions reduction fund in Australia?

Should farm business be selling their carbon offsets or will they need to keep these against their own emissions in future?

Interested to hear more on managing rumen to be a low methane organ, is that anything to do with energy to protein ratio?

When will we have a global accounting methodology?

What impact is continent drift having from changes in the geodatum that Australia is moving northward?

Does the NFF goal of maintaining the total farmed area at the 2018 levels include carbon farming? i.e. tree plantings or farm forestry.

Audience questions for keynote speakers

Are legumes key to increasing soil carbon in our farming systems?

How do sampling and measurement protocols for soil carbon differ between broadacre and perennial crops like vines and trees

How could I use organic amendments to build carbon?

Beyond monetising C sequestration, why else should I be looking to build carbon?

What is the best way of testing soil for carbon in SA if you did want to be ERF ready?

How expensive are these soil carbon tests?

Are there any new technologies or apps that you feel benefit the measuring of soil carbon?

Will leaving your dry soil sample for a week or more out of a fridge before sending to lab affect the measurement?

Audience questions for farmer panel speakers

Do you have a long term plan to manage predicted impacts of the climate? if so what does the plan look like?

What have been the most effective ways to engage other farmers in the climate change discussion?

How are you actually measuring carbon on farm - samples per hectare and how frequently?

Do you think that carbon farming options on your farm will be profitable in the short to medium term?

What are main sources of information you use to inform you on options to manage the impacts of climate change into the future?

Do you have an understanding of the carbon budget associated with creating biochar?

Did you consider wood chipping instead of biochar - would also see fungal levels increase?

Are you able to quantify the impact you've had at Pannell in terms of environment gains?

Please rate your satisfaction with the presenters

Please rate the quality of the content

**Overall, how satisfied were you
with the event?**

33% Satisfied

66% Very Satisfied

As a result of this forum, how would you rate your understanding of the farming pathway to carbon neutral?

**Would you like to continue the journey
towards carbon neutral with future
support from the farming group
networks?**

Richard Eckard's presentation was my standout in terms of producer friendly info. Steve Wiedemann had some great info. Tom Grant did a great job presenting about the olives.

What were your favourite moments?

Farmer experiences

Opening Plenary Sessions were great!

Q & A Sessions

Getting a better understanding of soil carbon

Opening Plenary Sessions were great!

One of the best online forums I've attended in terms of organisation, flow & presentations.

All good!

Breakout Sessions

- "Well done to all for pulling off the seamless virtual event and for the quality of presentations
- Really well done. Great job Belinda!
- Great work putting together a virtual event at such late notice. Certainly the best virtual forum I have participated in so far!
- Thanks very much, a really interesting and valuable event
- I think you did a really good job to get it up as an online event so quickly and smoothly - well done!
- Thank you and well done and Belinda, you did an amazing job as MC and well done also to Kerry and team behind the scenes, massive effort!
- Great platform, prefer this as a delivery model for information gathering
- Great line up of speakers and delivery was of high quality especially given the short change from in-person to online. Looking forward to the next one being in person and the opportunity to network!"
