An interconnected system of digital capabilities unleashes new opportunities in agricultural supply chains

NEW GEOGRAPHIES OF CLIMATE CHANGE

Movement of people, climate regions, and crops define an era of uncertainty

REWIRING THE GRID

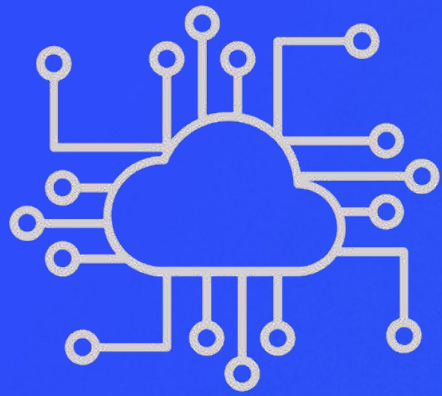

Distributed energy production is made possible by advancements in renewable and alternative technologies

DOMESTICATING THE CELL

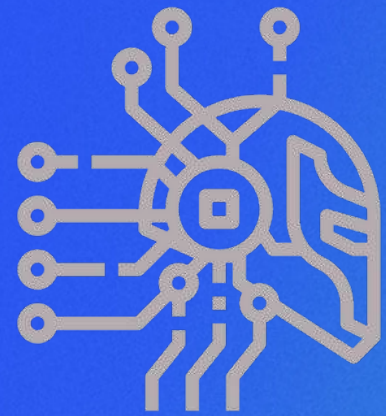

New products, experiences, and concerns will arise from our ability to design biology

A convergence of technologies

CLOUD

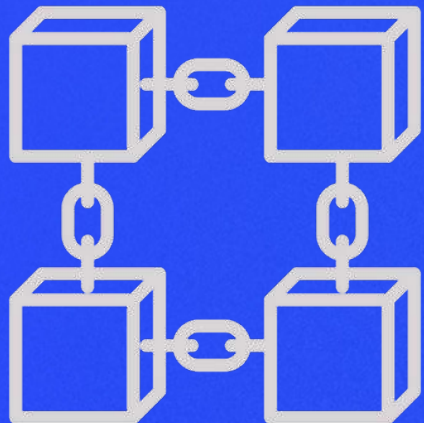

ARTIFICIAL
INTELLIGENCE

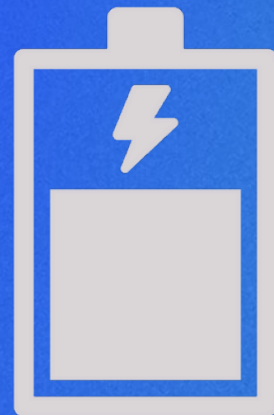

SENSORS (IOT)

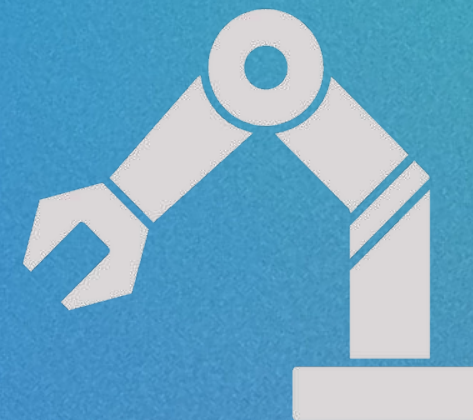

CONNECTIVITY

BLOCKCHAIN

RENEWABLE
TECHNOLOGIES

ROBOTICS

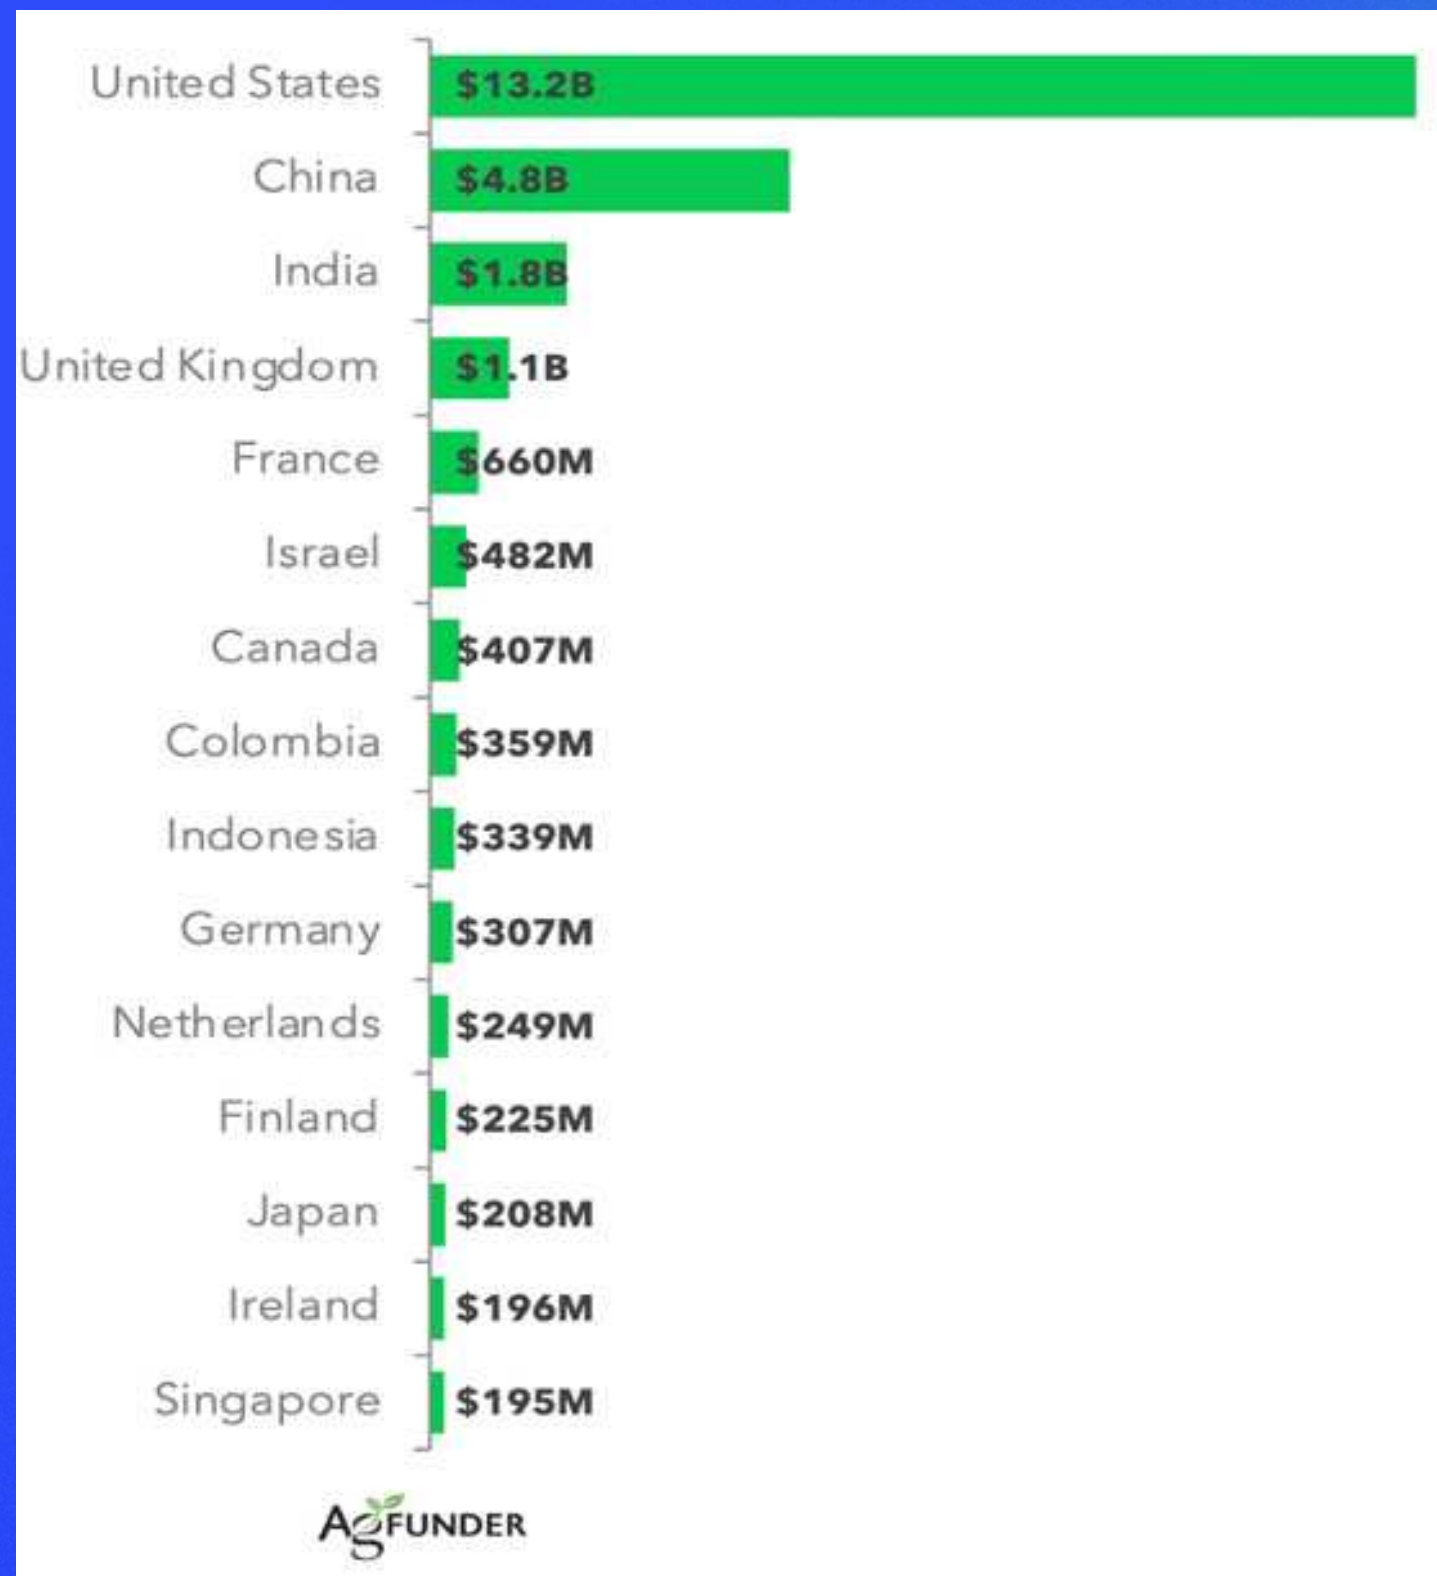

SYNTHETIC
BIOLOGY

Future Forces forecasts

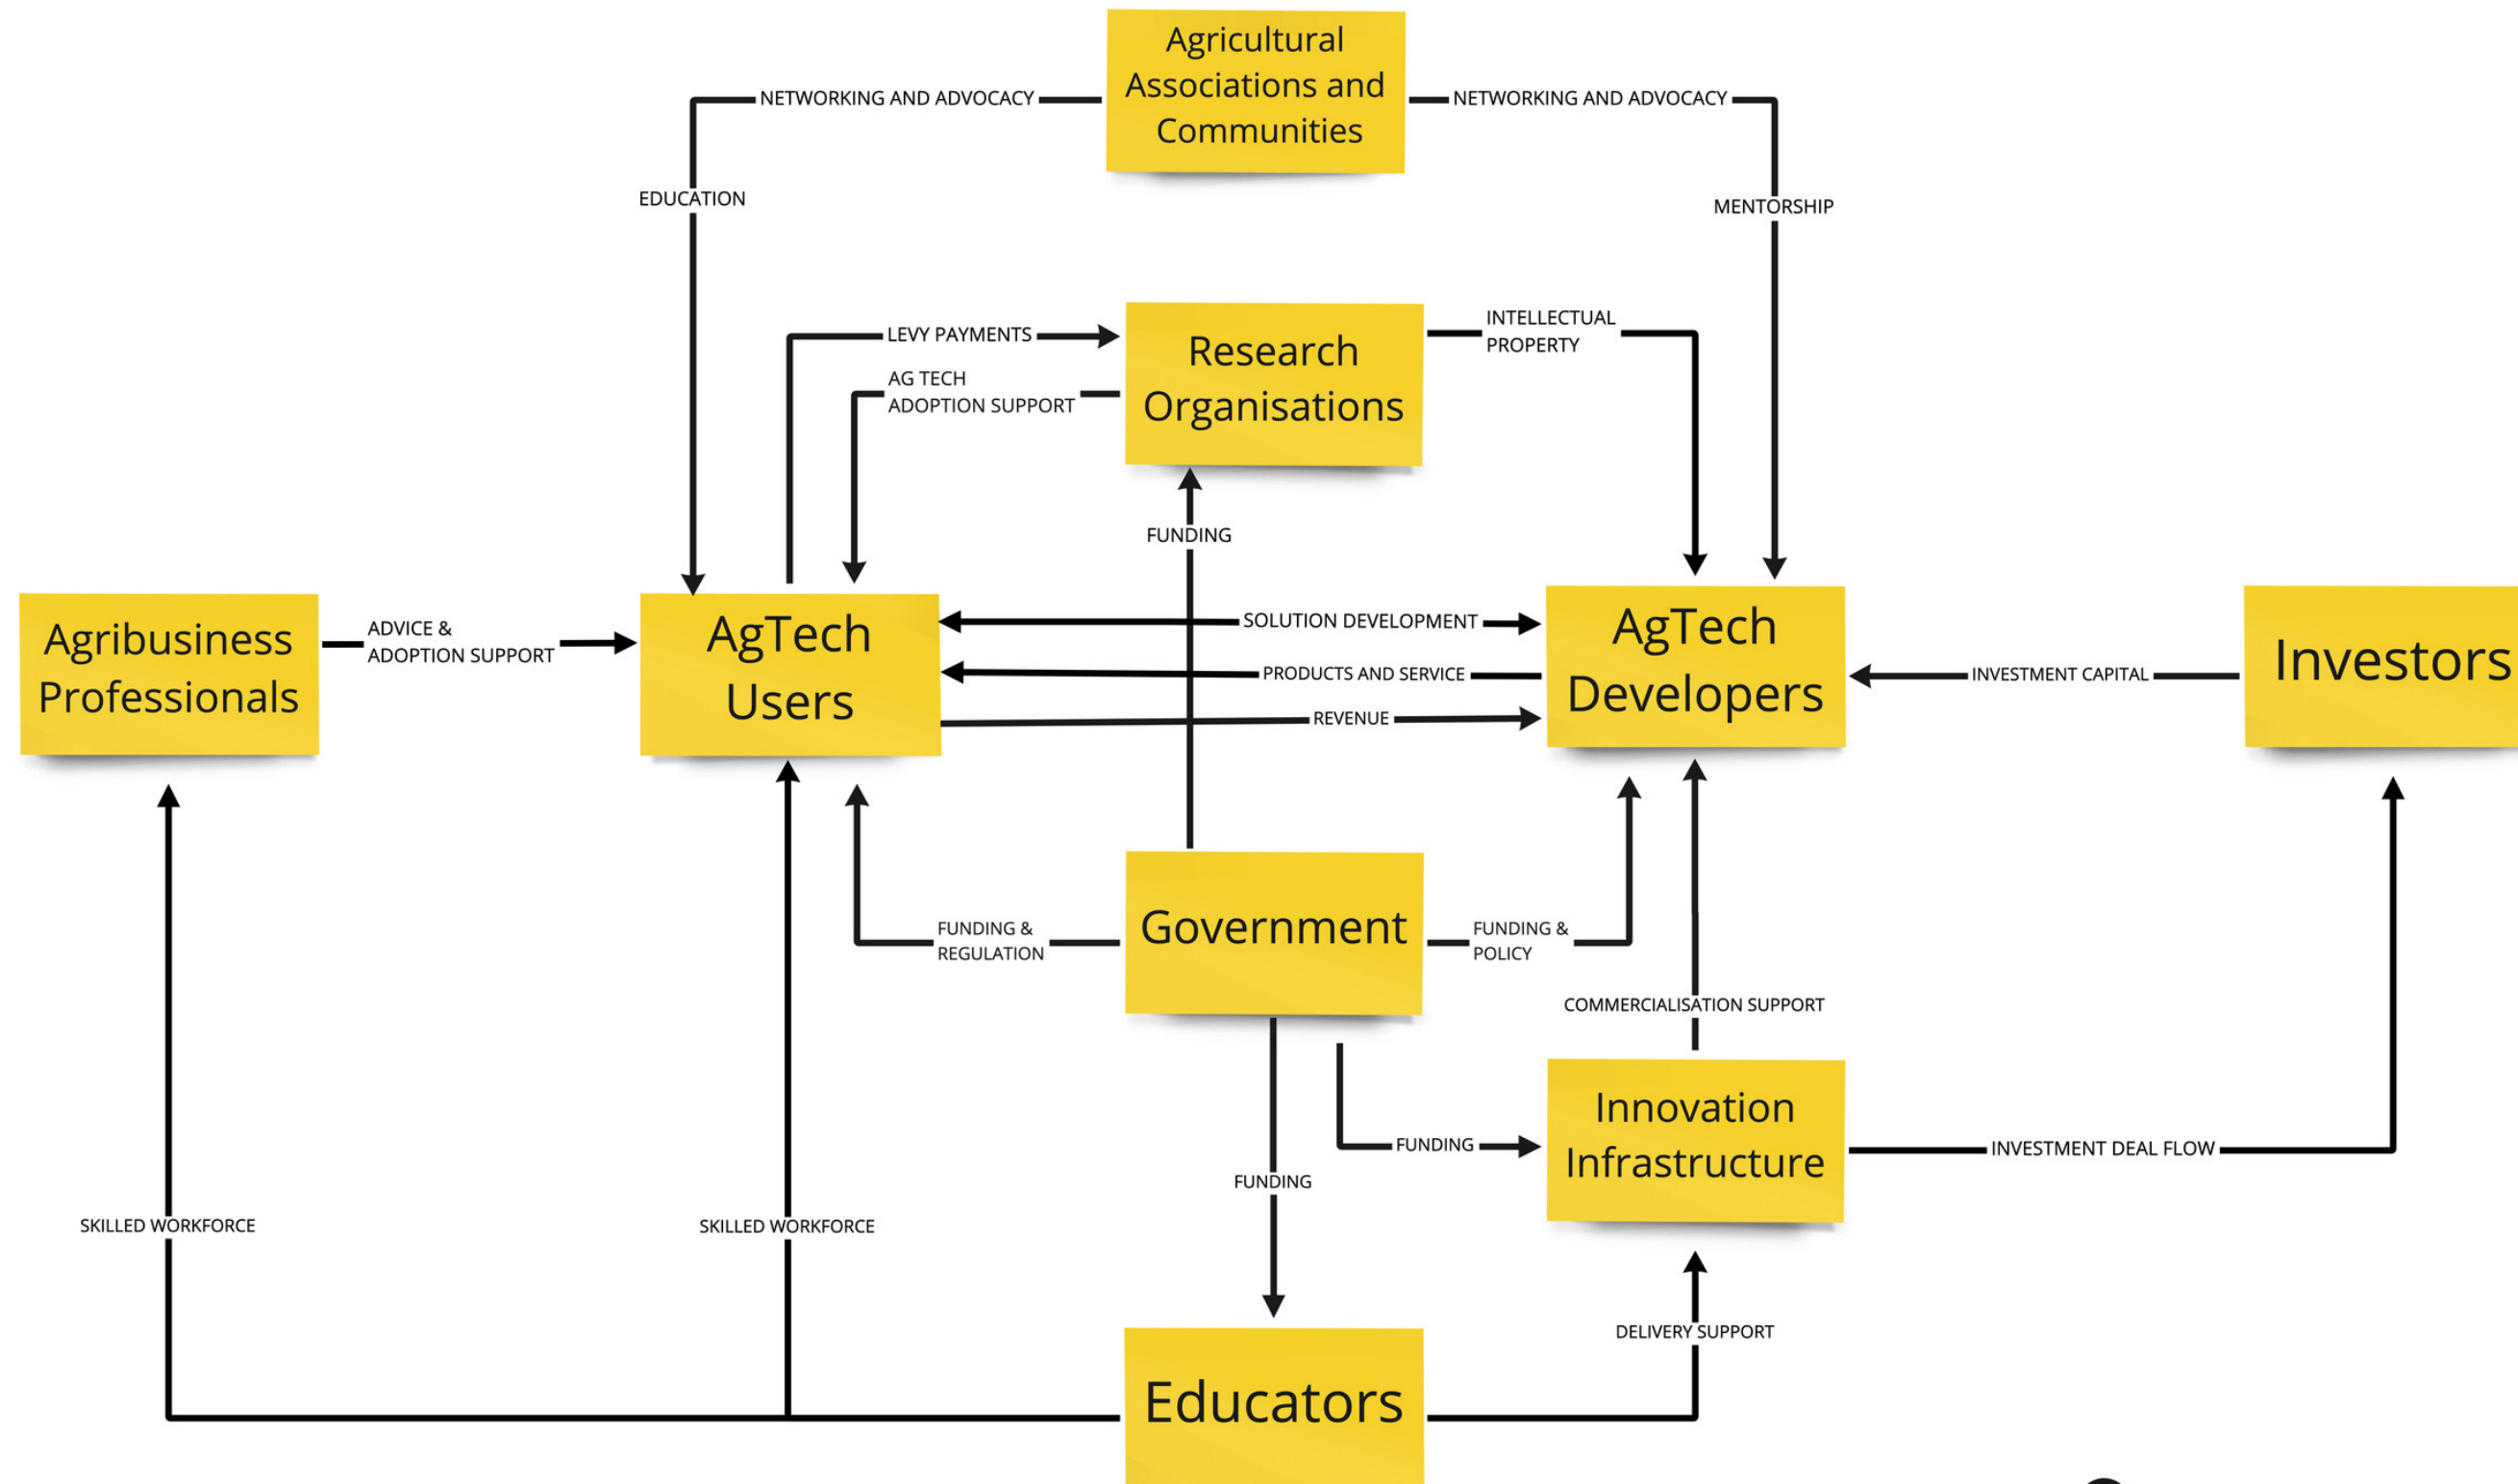

The opportunity for Australia

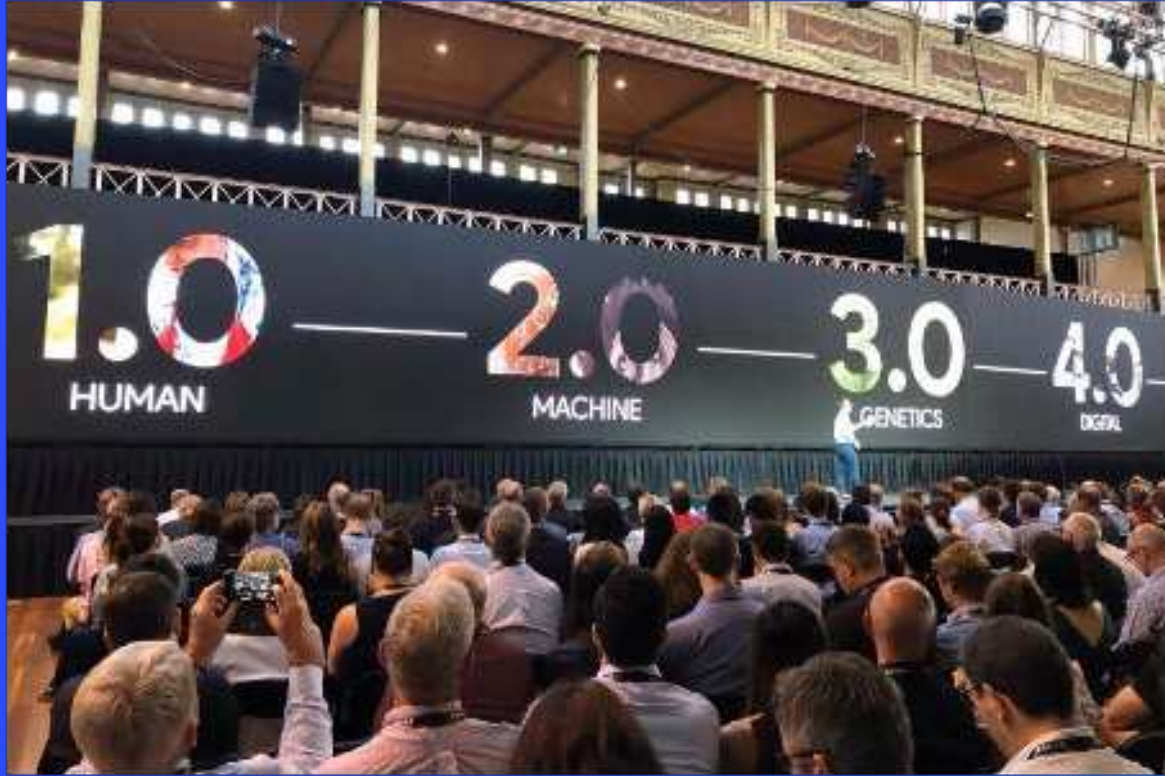

- Australia has all of the components to be globally competitive in AgriTech Innovation.
- Food and Agribusiness is currently an \$80 Billion per year industry in Australia, predicted to reach \$100 Billion by 2030
- A strong history and pipeline of research and innovation from CSIRO, RDCs and Universities ready for commercialisation.
- AgriTech is an enabler to improve Agribusiness and a potential \$20 Billion Industry in itself.
