

Building resilient businesses that tap into their strengths and support systems to overcome farming adversity and challenges.

Do you operate a South Australian grain or livestock business?

Do you want to learn how to manage and adapt to risk?

Do you want to improve your business' economic, environmental and social resilience?

Get subsidised access to leading advisers who will deliver both on-farm support and group workshop learning to prepare you and your business to bounce back in the face of adverse climate and other challenges through the AgRi-Silience program, a project delivered by Livestock SA.

Local facilitators will deliver fun, interactive and action filled group sessions, expert guidance and coaching designed especially for farming families, along with the support of subject matter experts with specialist skills in strategic farm business management and planning, natural resource management, farm risk management and decision making, and personal and social resilience.

With the one-on-one support of a subject matter expert, participants will complete the program with a **Resilience Roadmap**, helping build resilience and improve the business' productivity, profitability and sustainability over the long-term.

Each participating business is required to contribute \$500 (ex. GST) and, where there is a genuine need, may be able to access reimbursement for travel and childcare costs from PIRSA.

AGRI-SILIENCE WILL HELP YOU AND YOUR STAFF:

- Improve your financial literacy and, in the process, learn new ways to build the financial viability of your business.
- Become more confident in decision-making by conducting risk assessments.
- Learn new skills and techniques to build your own personal resilience.
- Become high-performing team members regarding decision-making and operations.
